

Neighborhood Recommendations

Improving Laurel Park (Green Space)

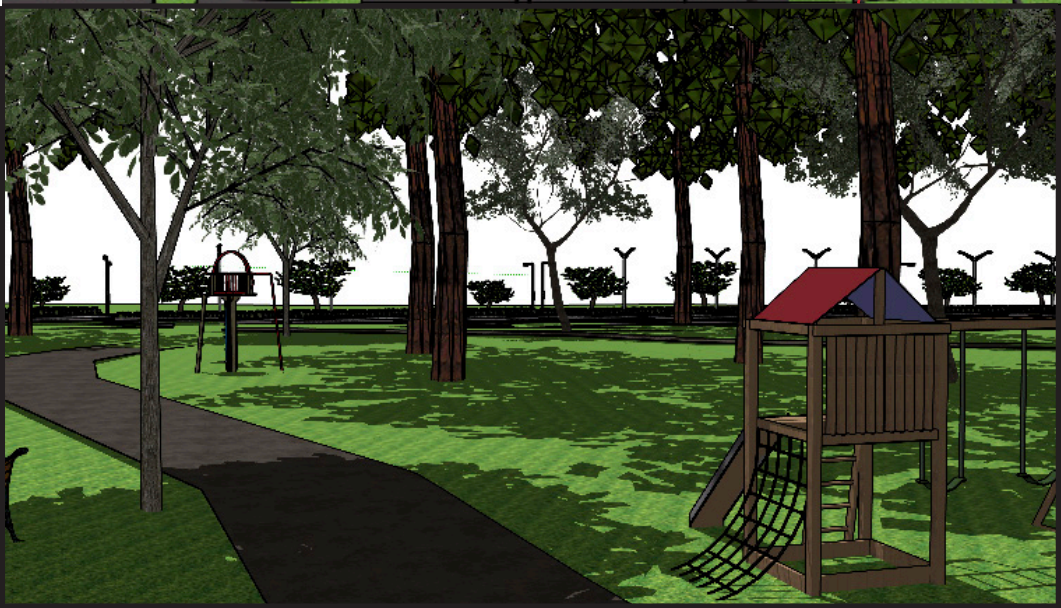

Current situation:

There is a lot of free space along the edge of the semi circle surrounding the park. The park itself does not have much life, just pathways and trees. The park is in a new developing area near TQL stadium and is looking to be a new area to be gentrified.

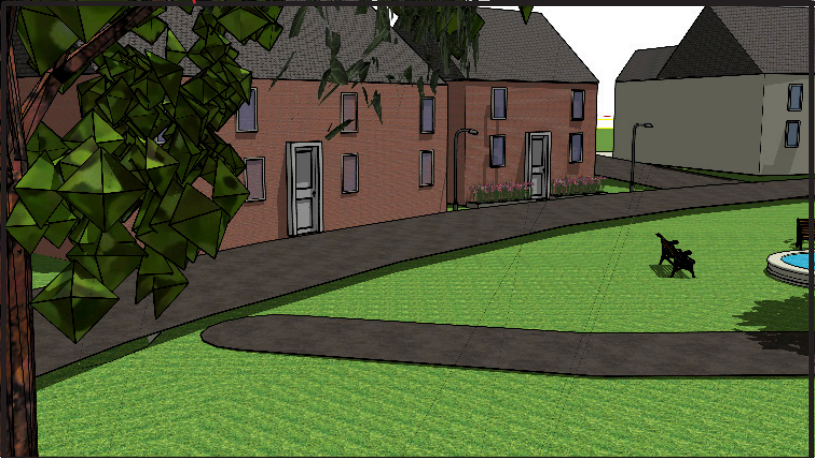

Proposal: Adding houses along the semi-circle surrounding the current park. In the park, adding water fountains, benches to sit on, more trees for canopies, and playsets for children.

A water fountain with benches around it for people to gather. It is also a nice place for shade from the sun.

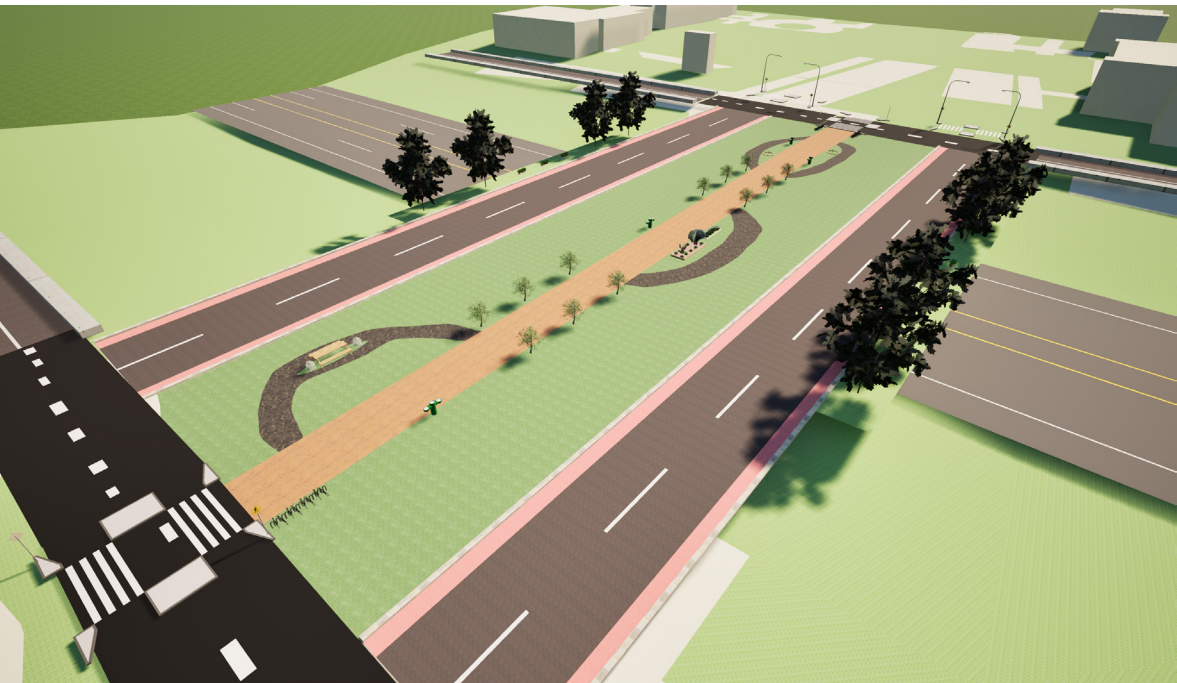

A playset for children to play on

Here are new townhomes filing the outside of the semicircle with a beautiful scene of the new and improved green park.

Overview of whole project.

Why, and how it contributes to West End: Adding something like this cap would further incentivize actually walking through the neighborhood, in conjunction with driving foot traffic to the aforementioned upgraded amenities. It also provides a grander, more fitting entrance to Union Terminal, an icon of the City of Cincinnati.

Pathway going towards Union Terminal, Pathways with water fountains, bike racks, and open green space

Pathway going towards West End, similar amenities
